

# ENROLL TODAY

## SAVE ENERGY & MONEY TOMORROW

**National Grid and Eversource MA** are partnering with **A Better City** to offer a Level I Building Operator Certification Course in Boston for eligible customers. **BEGINS MARCH 26, 2019.**

**Building Operator Certification (BOC®)** helps building engineers, maintenance supervisors and others in the skilled trades advance their skills and careers in energy efficient operation of commercial buildings. Since 1996 BOC has equipped building operators with the know-how to reduce building-related energy consumption and occupant comfort complaints.

**BOC Level II** training prepares building operators to evaluate the operational performance of their buildings with a focus on improving energy efficiency. Operators learn how to collect and analyze building data in order to prepare a building walk-through plan to identify opportunities to improve performance. Optimizing HVAC control systems for energy efficiency is highlighted with an emphasis on equipment sequence of operation and functional testing.

**BOC Level I** is designed for operators with two or more years of experience in building operation and maintenance who wish to broaden their knowledge of the total building system. Completion of Level I requires a time commitment of 74 hours which includes seven classes, work-site projects, and open-book tests.
